Greenvity Energies

Company Profile

Engineering the Energy Transition.

C&I Renewable Energy Solutions | RESCO | EPC

Founded **2025**

Presence **Gurugram | Rewari | Kanina**

Track Record **15+ MW across 50+ sites**

Company Snapshot

Renewable energy partner for commercial and industrial clients

- Founded in 2025; HQ: Gurugram, Haryana
- Presence: Delhi-NCR & Haryana; expanding across India
- Business model: Long term PPA with zero upfront cost
- Core focus: Rooftop solar for C&I customers
- End-to-end: Develop, Finance, build, own & operate
- One accountable partner for approvals, execution, & O&M

15+ MW
Projects delivered by founding team

50+ Sites
Executed locations

Vision & Mission

Long-term partnership model for India's C&I transition

Vision

To become a leading integrated renewable energy infrastructure company powering industries through innovative, reliable, and sustainable energy solutions.

Mission

Accelerate clean energy adoption, deliver cost-optimized projects with high technical reliability, and integrate storage and hydrogen into scalable ecosystems.

Business Model: RESCO & EPC

Developer-owned RESCO with turnkey EPC option

RESCO

- GreenVity develops, finances, owns, and operates assets
- Client pays only for generated energy under long-term PPA
- Zero or minimal upfront capex for customers
- Performance-guaranteed generation and managed O&M

EPC

- Turnkey engineering, procurement, and construction
- Detailed design, installation, testing, and commissioning
- Grid synchronization, approvals, and handover support
- Suitable for clients preferring direct asset ownership

Single-vendor accountability across assessment, approvals, build, and operations.

Solutions Portfolio

Onsite, offsite, storage, and future-ready pathways

Rooftop Solar

Industrial rooftops, commercial facilities, warehouses, institutions

Ground-Mounted

Captive, group captive, and utility-scale installations

Open Access

Offsite solar/wind hybrid with long-term PPA structuring

Energy Storage

BESS for peak-load management, backup, and stability

Hybrid & Emerging

Solar-wind hybrid, hydrogen readiness, and optimization

Industries We Serve

Tailored to load profile, schedule, and expansion plan

- Manufacturing facilities
- Fulfillment & logistics centers
- Corporate offices / campuses
- Cold storages
- Temperature-controlled facilities
- Commercial Complexes
- Educational Campuses
- Healthcare facilities

Project Execution Framework

Assess | Design | Structure | Build | Operate

1. Assess

Load analysis
Tariff benchmarking
Feasibility + ROI

2. Design

System sizing
Structural + electrical
Compliance planning

3. Structure

CAPEX/OPEX selection
PPA structuring
Approvals documentation

4. Build

Tier-1 procurement
Quality installation
Safety compliance

5. Operate

Commissioning tests
24x7 monitoring
Preventive O&M

End-to-end delivery model with one accountable partner from concept to lifecycle O&M.

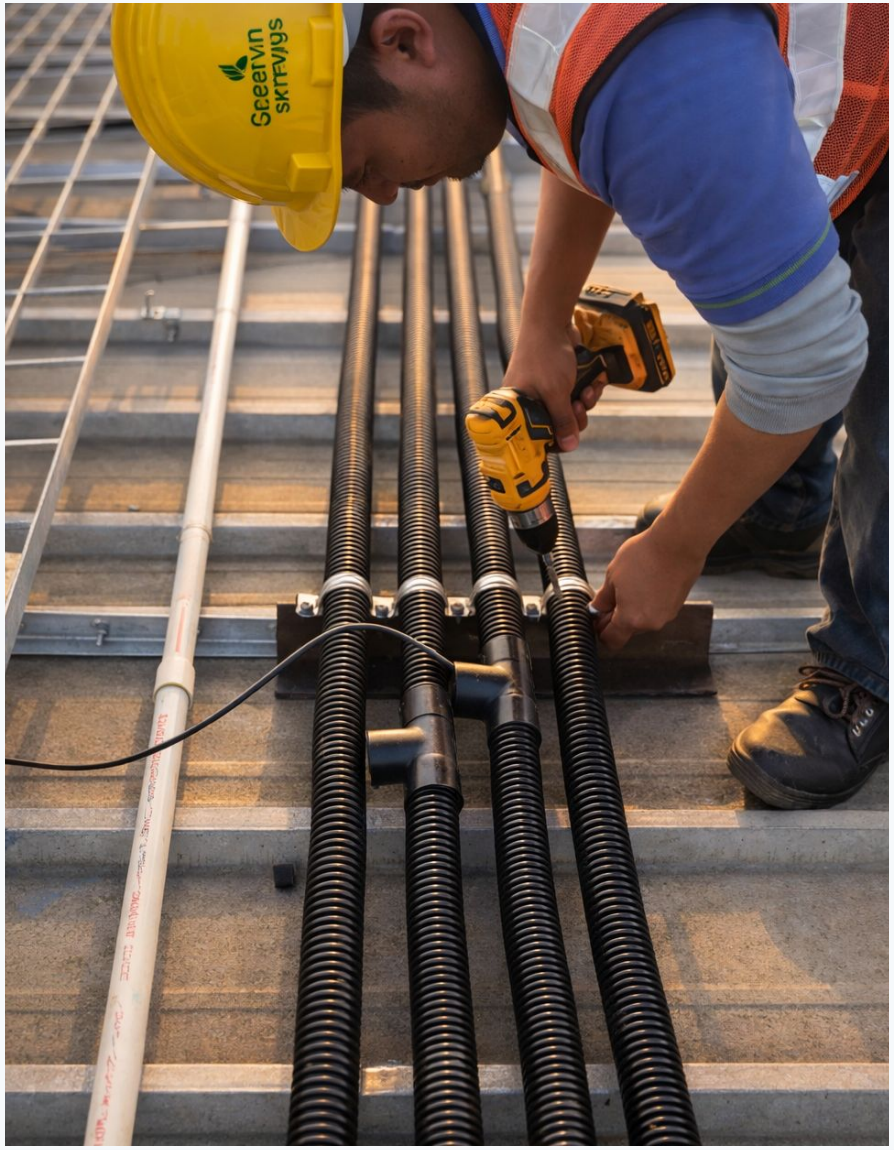
Technology & Quality Commitment

Safety-first engineering with validated vendors and controls

- High-efficiency modules, advanced inverters, and robust mounting systems
- SCADA-enabled monitoring and analytics for generation visibility
- Battery-ready design provisions where operationally relevant
- Strict vendor qualification and tier-1 equipment procurement

Quality Control Measures

- Structural and electrical engineering design validation
- Compliance planning and safety supervision
- Tier-1 equipment sourcing and vendor qualification
- Performance ratio tracking and maintenance audits
- Battery-ready provisions where required



Operations, Monitoring & O&M

24x7 oversight with SLA-based response and transparent reporting

Remote Monitoring
Real-time alerts, periodic analytics

Preventive Maintenance
Scheduled inspections, cleaning cycles, and health checks

Corrective Maintenance
Defined SLA response timelines and root-cause closure

Warranty & Lifecycle
OEM coordination, replacement planning, spare readiness

Reporting
Monthly generation and performance reports for stakeholders

Procurement-Focused RESCO Framework

Cost certainty, risk transfer, and contract-backed accountability

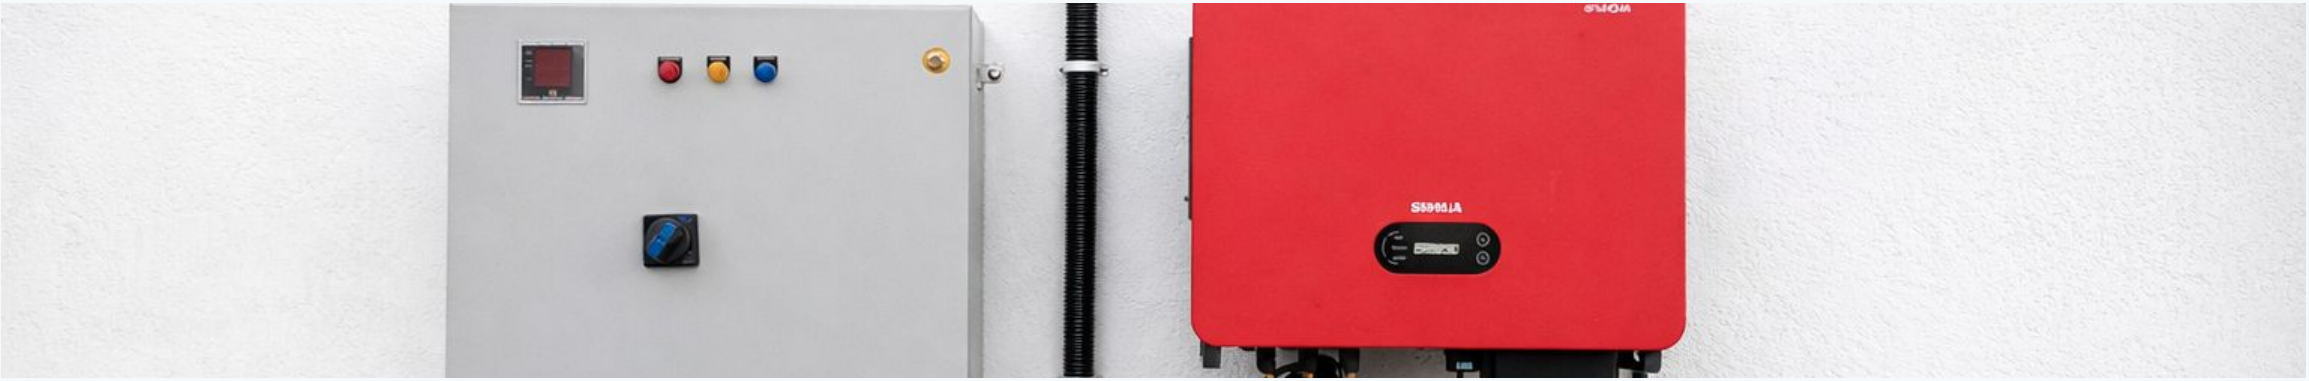
- Zero upfront investment: GreenVity funds the plant
- Pay only for generated kWh under agreed tariff
- Tariff visibility supports long-term budgeting
- One PPA + one SLA for single-vendor accountability
- Asset ownership and O&M remain with developer

Performance Assurance

Contractual generation commitment: >=80% of annual committed units, with remedies defined in PPA/SLA (subject to site conditions and exclusions).

Track Record & Portfolio

Verified references from founding team experience



15+ MW
Delivered capacity (founding team experience)

50+
Sites executed

1 MW
JUYSHIN rooftop in Bawal

JUYSHIN (Minda Group), Bawal
Industrial rooftop | 1 MW | Rooftop Solar

Minda Group Portfolio
Multi-site deployment | Part of 15+ MW aggregate

Happy Tokus
C&I facility | Part of 15+ MW aggregate

PHED Haryana / PM-KUSUM
Program deployment across Haryana locations

Sustainability Impact + Contact

- Reduction in carbon emissions and lower fossil-fuel dependency
- Improved energy-cost stability for commercial and industrial clients
- Support for clean-technology adoption and Scope-2 reporting
- Optional resilience through battery-ready architecture
